voice reader®
The Number One Voice Output Program

Voice Reader Benefits:

- ★ **Have text read out to you** directly at the PC or convert it to an audio file and listen to it later on your MP3 player.
- ★ **Improves comprehension:** A study carried out by the University of Regensburg (Germany) proves that listening comprehension is 29% higher than reading; if you read and listen simultaneously to a text, the efficiency increases up to 44%.
- ★ **Use time more efficiently:** In the car, on the plane, on the train, while jogging or relaxing – now you can have your text read out without having to stare at a screen or a piece of paper.
- ★ **Spot mistakes earlier:** Awkward style, incorrect word order, missing words ... these mistakes are easy to miss when read, but stand out when heard.
- ★ **Listen and relax:** Compile your own audio books and have great literary works read to you.
- ★ **Prepare speeches:** Listen to your scripts for speeches, lectures or presentations to check the effect – also ideal if you want to improve your memory of any kind of texts!
- ★ **Free yourself from the screen:** Give your eyes a break or move freely in your office while you listen to e-mails or memos.
- ★ **Improve foreign language learning:** With additional language packs, e.g. French, German, Italian, Portuguese, Spanish, Dutch or Czech, you can use Voice Reader to listen to texts in foreign languages and make a lasting improvement to your listening and pronunciation skills.

Press

June 2007

The previously unattractive machine voices now sound so life-like that listening is simply enjoyable.

3rd April 2006

Thanks to Voice Reader users can now let their eyes wander from their desk or deal with routine work whilst on the move.

5th March 2006

Opens up diverse possibilities for listening to all kinds of texts on an MP3 player whilst on the move. Also useful in targeted preparation for lectures or for language learning. The Text-to-Speech (TTS) technology enables conversion of a typical speech melody, which works amazingly well in practice.

For English texts. Also available for: French, German, Italian, Portuguese and Spanish, as well as Czech and Dutch.

System requirements:

Windows 2000 SP2 or higher, Windows XP; 400 MB free hard disk space; internet access for product activation; Internet Explorer (Version 6 or later). **Supported uses:** Word, Outlook, PowerPoint (Version 2000 or later); Adobe Acrobat (Version 7 or later); iTunes. **Text file formats:** DOC, RTF, TXT, HTML.

Audio file export: MP3, WAV

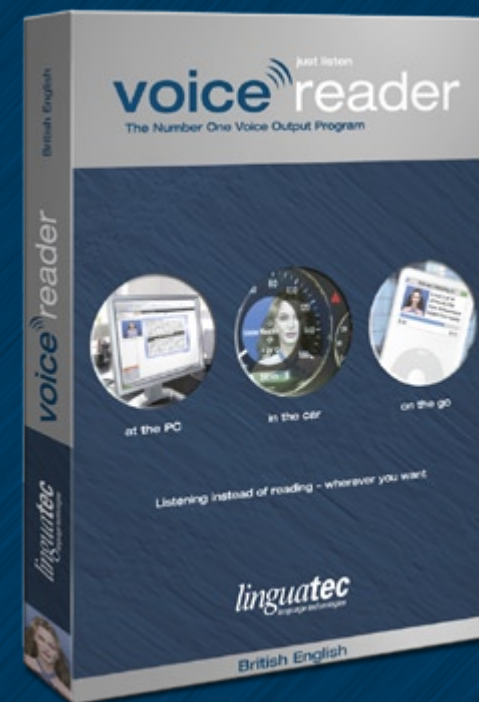

You won't believe how real the voice sounds.

just listen voice reader®

The Number One Voice Output Program

Use your time efficiently

Optimise the time you spend every day in your car: listen to your e-mails, learn about new topics or have important reports read out to you – without taking your eyes off the road.

Thanks to the latest Text-To-Speech (TTS) technology, Voice Reader offers outstanding speech quality. The pleasant voice and its natural intonation recreate an amazingly authentic experience of listening to a human speaker. In this way, the text read out can be understood very easily and longer documents are no longer tiring on the listener.

100% mobile

With one mouse-click you can transform any text document into an audio file and copy it to your MP3 player so you can listen to it in peace – wherever and whenever you want.

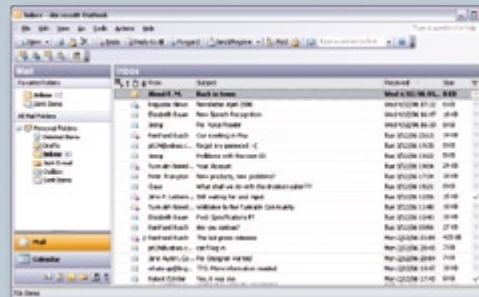

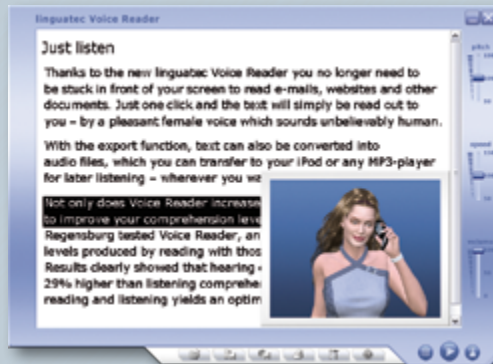

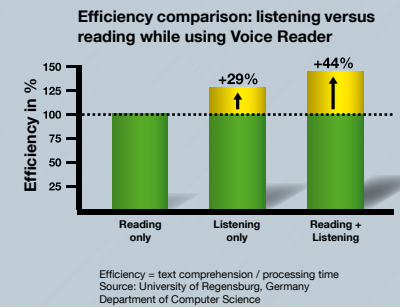

Your very own personal audio book

The Internet is a gold mine of literary works and topical articles: simply listen to what interests you – whilst on holiday, travelling, jogging or relaxing on your sofa in the comfort of your own home.

Why listening is better than reading

The University of Regensburg, Germany tested Voice Reader thoroughly by carrying out a user test. The results clearly showed that using Voice Reader reduces the processing time of text whilst increasing comprehension levels substantially. Absorption capacity from listening is 29% higher than from reading. The best result was achieved by those who read and listened to a text simultaneously. The improvement rate when compared to mere reading was a staggering 44%!

If you really want to understand a text well, have it read out to you by Voice Reader whilst you are reading it. Adjustable reading speed and synchronised highlighting of text offer the greatest possible comfort.

Convert e-mails automatically

With the plug-in for Outlook you can have your e-mails converted easily and automatically into audio files the moment they enter your Inbox. Just select the option and then the path where you want the files to be saved to, i.e. directly to your USB stick, or MP3 player, so you can listen to them later. Of course you can also listen to them directly at your PC.

Instead of reading, listen to:

the latest news on the Internet, Word and PDF documents, e-mails and newsletters... Simply have them read out to you by a pleasant-sounding voice instead of having to read them yourself.

Voice Reader Studio

The cost-effective alternative to a recording studio

Voice Reader Studio allows you to provide your digital texts and content in both text form and as an audio file. Readers can download the audio file and listen to it later on. Record presentations (PPT), flash demos or videos and photo shows automatically in no time at all, without even having to leave your PC! What's more, it's ideal for e-Learning applications, especially languages, for improving listening and pronunciation skills.

The Voice Reader Studio licence agreement allows you to distribute the audio files you created, making it the ideal choice for professionals.

Easy listening

Improve your level of comprehension, seek help while preparing presentations and speeches, or simply sit back and give your eyes a rest whilst Voice Reader reads the text out for you. Once you've tried Voice Reader, you won't want to do without it.

Not only can you hear the speaker, but you also have the option to see her: a friendly virtual reader recites the texts to you, with perfect lip synchronisation.
