

## Shoot & Translate

### Sales arguments

- Groundbreaking innovation: first translator for camera mobile phones
- Take the photo and have the text translated
- Look up words anytime, anywhere
- Practical read-out functionality
- For mobile phones, smartphones, PDAs
- The ideal partner for travelling and holidays

### Technology

- **High-performance text recognition (OCR)** extracts the text from the image
- Uses **innovative translation technology** from Personal Translator 2008 Professional
- Natural sounding **speech output**
- **Extensive dictionaries** with up to a million entries per language pair
- **SmartCorrect™**, the intelligent corrector of typos during translation, e.g. "raost beefe snadwitch"

### Application scenarios

- **Mobile translator** that can be taken anywhere
- **Small and handy:** works directly on your mobile phone
- **Practical and always at your side:** helps you translate wherever you are and whenever you need it
- **Translates pictures** of wording on signs, menus, posters, etc.
